Present. Hon George G. Grattan, presiding.

The Court having maturely Considered the recommendation of Prof J N Fries
for the office of County Surveyor, made by a majority of the Board of Supervisors

on the 1st day of June 1891, and waiving any objection thereto on account of informality, doth reject said recommendation for the following reasons. As is well known a Controversy is now pending between the Counties of Rockingham and Augusta in regard to the true location of the dividing line between these Counties from North River to the top of the Blue Ridge Mountain – Mr. Jasper Shaver the present County Surveyor has under the order of this Court made a very Careful Survey of that line and has expended much labor and Skill in examining the records locating old Surveys in order to establish the Correctness of the line as located & reported by him, and the Court decides: it highly important that until this matter of dispute is settled, that the County of Rockingham should retain the Services of a Surveyor of such known Skill and experience as Mr. Shaver and should have the advantage of the large amount of work done and information possessed by him in regard to this question of so much interest to the people of the County.

On the Court's own motion an order upon the Consideration of the report made by Wm B. Bowers Commissioner of Roads for Plains District in this County that it is necessary to make an examination of the road leading from Orkney Springs road to the North Mountain Road passing through the lands of S. They shall further report the facts and Circumstances in their opinion useful in enabling the Court to determine the expediency of establishing or changing the said road the said viewers may examine other routes than the one proposed and report in favor of the one they prefer with their reasons for such preference They shall report the names of the land-owners on such route, and state which of them require Compensation: the probable amount in their opinion to which such party may be entitled, and any other matter which they may deem pertinent. They shall not locate any route on which there may be a grade at any one point exceeding six Degrees and shall endeavor to locate a route which shall not exceed five degrees at any one point. A Map or diagram of the route with Courses and distances shall be returned with their report. A Statement of the number of days each viewer and Surveyor was employed in executing this order shall be appended to the report; and sworn to before a Justice of the Peace or other officer who shall append his Certificate to the same Any defect in the action or report of the viewers will debar them from receiving pay for their services.
