Report of Commissioners Appointed to Ascertain and establish the true line between the Counties of Rockingham and Augusta.

To the County Courts of Rockingham and Augusta Counties

The undersigned Commissioners appointed to ascertain and fix the boundary line of Rockingham and Augusta Counties, met at the "Cave Hotel" near the line, in the month of May 1892, and were duly qualified to discharge the duty imposed upon them. Messrs Hawse and McCutchan the two County Surveyors, were also in attendance. After much examination and discussion, it was found that the Commissioners could not agree.—

Another meeting of the Commissioners and Surveyors was held at the same place in the month of June 1892. and with the same result.

After the second meeting the plat and Survey of the line as run by John Poage, Surveyor of Augusta County, in 1796, was found amongst the Archives of said County; but still the two Surveyors disagreed in regard to several particulars.

In this dilemma, it was suggested and agreed to submit the matters in Controversy to the decision of Professor Wm M. Thurston of the University of Virginia. Prof Thurston accepted the employment, and in June last, with the assistance of Messrs Hawse and McCutchen made a reconnoisance of the lines proposed by the said Surveyors, respectively, with the view of Ascertaining the true line, or the line run by Poage.

The report of Prof. Thurston, submitted to the Commissioners this day (July 11. 1893) is herewith presented; and in accordance with the previous agreements the undersigned adopt the line indicated in said report as the line between the two Counties, Viz: A straight line from "Brubls Corner" on the Blue Ridge to the middle of North River at Beard's Ford. In regard to this line from Beards Ford westward, there is no Controversy.

The Commissions recommend that the report of Prof Thurston be

recorded as a part of this report; and that permanent monuments be erected by James R. McCutchan, Surveyor of Augusta County. at the joint and equal expense of the two Counties, in the said lines at the following points Viz: 1. Brubels Corner. 2 top of Trayfoot Mountain 3. near Black Rock Spring road. 4. at the Shenandoah Valley Railroad 5. at same point near South River, and 6. at the Port Republic road. It was understood and agreed, that the Compensation of Prof Thomson for his Services should be paid by the two Counties – each one half; and the undersigned ask that allowances be made therefor

Whole Bill ——— $107.40

Payable by each County 1/2 53.70

Each County is expected to pay its own Commissioners and Surveyors for their Services.

27 June 1893

To the joint Commissioners of
Augusta and Rockingham,
Gentlemen,–

Upon the invited invitation of the Judges and Surveyors of your two Counties I visited Sheridan, on 21st June 1893, and spent the 21st, 22nd. and 23d. in making a careful instrumental reconnoissance of the two conflicting locations for the division line between the Counties from the Blue Ridge to Beards Ford on North River. The terminal points of the two lines were first located and flagged. A transit was then set in line on Trayfoot Mt. in such a position that the whole length of both lines was visible at once. The instrumental adjustments were carefully tested in position, and intermediate stations were then located near South River. Great care was taken to ensure precision and the two lines were tied together at the eastern station on the Blue Ridge and on Trayfoot, and subsequently at South River and at North River. Numerous checks on location were thus established and the relative positions of the two lines were fully determined. I have since platted these lines to a large scale and on the same map have located all the points on or near the original boundary line which are fixed by documentary evidence or by clear and uniform oral tradition. I have also collected and carefully analyzed the documentary and traditional information bearing on the question and with the following results.

§1 Points established by documentary evidence

The documents before me have been the original survey of the line by John Poage S.A.C., dated 17th Feb 1796. and the resurvey of the western portion of the line by William A Bell, S.A.C., dated 30th Dec. 1828. In accordance with these documents the original boundary line satisfied the following conditions

1) It began on the Blue Ridge divide at a low place north of a path existing in 1796.
2) It passed within two poles (33') of the Mansfield house as it existed in 1828 (since burned)
3) It passed ~~about~~ 30 poles (495') above the site of the Brunson Mill as it existed in 1796 (now ruinous)
4) It passed a marked tree on the Port Republic road and others near it.

5) It Crossed Middle River 11 poles (182') above its junction with North River
6) It terminated on North River at Beards Ford as the river ran in 1796. and in 1828

§2 Points Confirmed by Oral Tradition

1) A definite tradition among the oldest and best informed residents of the neighborhood fixes "Grubbs Corner" as the intersection of the Augusta-Rockingham line with the Albemarle boundary. This point lies in the best marked "low place" on that part of the Blue Ridge divide; is North of a very old path which Crosses the ridge and was used by Indians and the earliest Settlers; it was established by Poage himself in 1795, and would naturally have been used by him as his point of departure in 1796
These Circumstances - which are incontestable give to this "low place" in the Ridge and to this especial point in it claims to a Careful examination and forbid its rejection except upon good evidence

2) The Mansfield house has been destroyed by fire. But the uniform testimony of owners and neighbors shows that the present Mohler house stands over the same site. Tradition locates the County line between that house (which has always been taxed in Augusta) and the ruins of a small building only 106' from it (which was always taxed in Rockingham. Upon the Surveyors admit this tradition to be Correct I have therefore assumed that a point in the County line must fall somewhere within this space of 106' tradition says about midway.

3) A pine stump (now much decayed) on the Port Republic road has been recognized by very general tradition as on the County line. I have given this tradition weight - not as fixing a location, but as Confirming the Accuracy of a location Chosen for weightier reasons.

§3. Final Conclusions.

As the result of a minute study of the problem before us I beg to recommend for the definite boundary between your Counties a line from "Grubbs Corner" in the Blue Ridge divide to a point at or near the middle of North River at Beards Ford. This line will fulfil the following Conditions

1) It begins at a well defined point on the Blue Ridge divide, north of the oldest path across the range, and Confirmed by Oral tradition and documentary indications as the origin of the boundary.

2) It passes between the original site of the Mansfield house (in Augusta) and the ruins of the old building (in Rockingham) being almost exactly 52' from the nearest Corner of the building now standing on the Mansfield Site.

3) It passes almost exactly 30 poles (492') above the probable Site of the Dennon Mill, as indicated in the original Poage Survey

4) It Crosses exactly over or within a few inches of a hickory Stump recognized as a probable line tree (from axe marks) in previous examinations of this Question

5) It Crosses exactly over or within a few inches of the old pine Stump on the Port Republic Road recognized by uniform oral tradition as in the County line

6) It Crosses Middle River eleven (11) poles above its junction with North River as demanded by the Original Surveys.

It will at once appear that the line recommended Satisfied every Condition furnished by document and tradition with all needed precision except one: it does not terminate on the South bank of North River as shown in Poage's plat For this discrepancy two probable reasons may be given

a) The Course of the river has shifted since 1796. This is made likely by the existence of an old Channel or bye-wash North of the present river bed

b) The lines run by Poage and Bell were Compass lines and not perfectly Straight as is probable from evidence noted below.

Both Causes have it may be, united to produce the result.

§4. Remarks.

1) It will be noted that no attempt was made to locate with absolute precision

any point in the boundary except the Grubb Corner. The reason for this is found in the fact that Poage's Chaining is Certainly slightly inaccurate, and entire precision in the Computations of the positions of intermediate points Cannot be attained without measuring or triangulating the lines anew.

2) No allusion has been made to the magnetic bearing of Poage's line or of the line recommended. This was N 47° 14' W at the N.W. end and N 47° 44½' W at the S.E. end. The difference of 30' was obtained on both the lines located, and appears to indicate the presence of weakly attracting ore masses under or near Trayfoot. If such masses really exist, Poage's line must have been slightly Curved.

3) The Variation in the Magnetic bearing in the 32 years 10 Months between the Poage and Bell Surveys was 1° 45'. At the same rate the variation between the Poage Survey and the present (97 years 4 Months) would be 5° 12'. Mr. Hause found by retracing the line run by Poage west of Beards Ford a Variation of 5° 15'. Our location gives a Variation of 5° 16'. These Coincidences are Conspicuous and interesting, but undue weight must not be ascribed to them

Much to my regret I have found it necessary to discard both the line of Mr. McCutcheon and that of Mr. Hause, though the boundary Chosen approximates Closely to the latter. My reasons for so discarding them are given in Appendices.

In Carrying out the reconnoissance I enjoyed the invaluable aid of Messrs McCutcheon and Hause and was ably assisted by Mr. John Harnsberger Mr. John Irvine and Mr. Harry Blackburn. I owe to these gentlemen the most Cordial expression of thanks for Courteous, Kind and efficient Service.

Permit me to express the belief that the line recommended as the nearest possible return to Poage's boundary, will Change the Allegiance of no Citizen of either County and the hope that monuments will be at once located on it and that it will prove to all parties a Satisfactory and final adjustment of Controversy

Very Respectfully
Your obt Servt.
Wm M Thornton.

Appendix A.
Reasons for discarding the McCutcheon line.

i The origin of the line is in a low place on the Blue Ridge. But this point is not the lowest place in the notch, but about 100' South of it. It is not on the North Side of any path across the ridge, but is arbitrarily Chosen on the West side of the road along the ridge. It is manifest that this point should be Chosen in the Albemarle boundary, which is the Crest of the ridge and Coincides with this road. To take it on the West Side of the road would be unreasonable and useless as an aid in definition. Nor does it seem probable that any one, much less a Skilful Surveyor, would describe a point as being on the North Side of the Blue Ridge — a location as unreasonable as it is surprising; for the Blue Ridge there bore only about N 24° E, much nearer North than East.

ii. Granting for the moment that the origin of the line should be placed somewhere in the McCutcheons notch, it is admitted by all that the line must run between the buildings at Mohler's Corner near South River. If we use Mr. McCutcheons Corner this will throw the line not less than 180' South of the South bank of the river at Beards ford and on ground where the river Could never have run. If we use the true lowest point of the notch the deviation will be 220'. These results appear to be absolutely fatal to the Claims of Mr. McCutcheons low place

iii. The McCutcheon line not only runs 40' beyond the extreme limit of deviation at Mohler's Corner, and Cuts Middle River nearly 50' too far above the mouth, but it passes 93' South of the Ford, and on ground where the river Could never have run. It touches the river bank lower down, it is true, but under a bluff where no ford Could ever have been located. The elm tree selected as the terminus bore cracks in the bark which were taken for hacks. But upon examination no signs of the axe marks could be detected below the surface. Moreover the

cracks were on the wrong side and the tree is apparently too young to have been used as a line tree in 1796.

I have been induced by this assemblage of reasons to discard the location proposed by Mr McClintchan as inaccurate and even impossible

Appendix B

Reasons for discarding the Hause line

i. The origin, although in the right "low place", was arbitrarily chosen near its northern end and not near its central and lowest point.

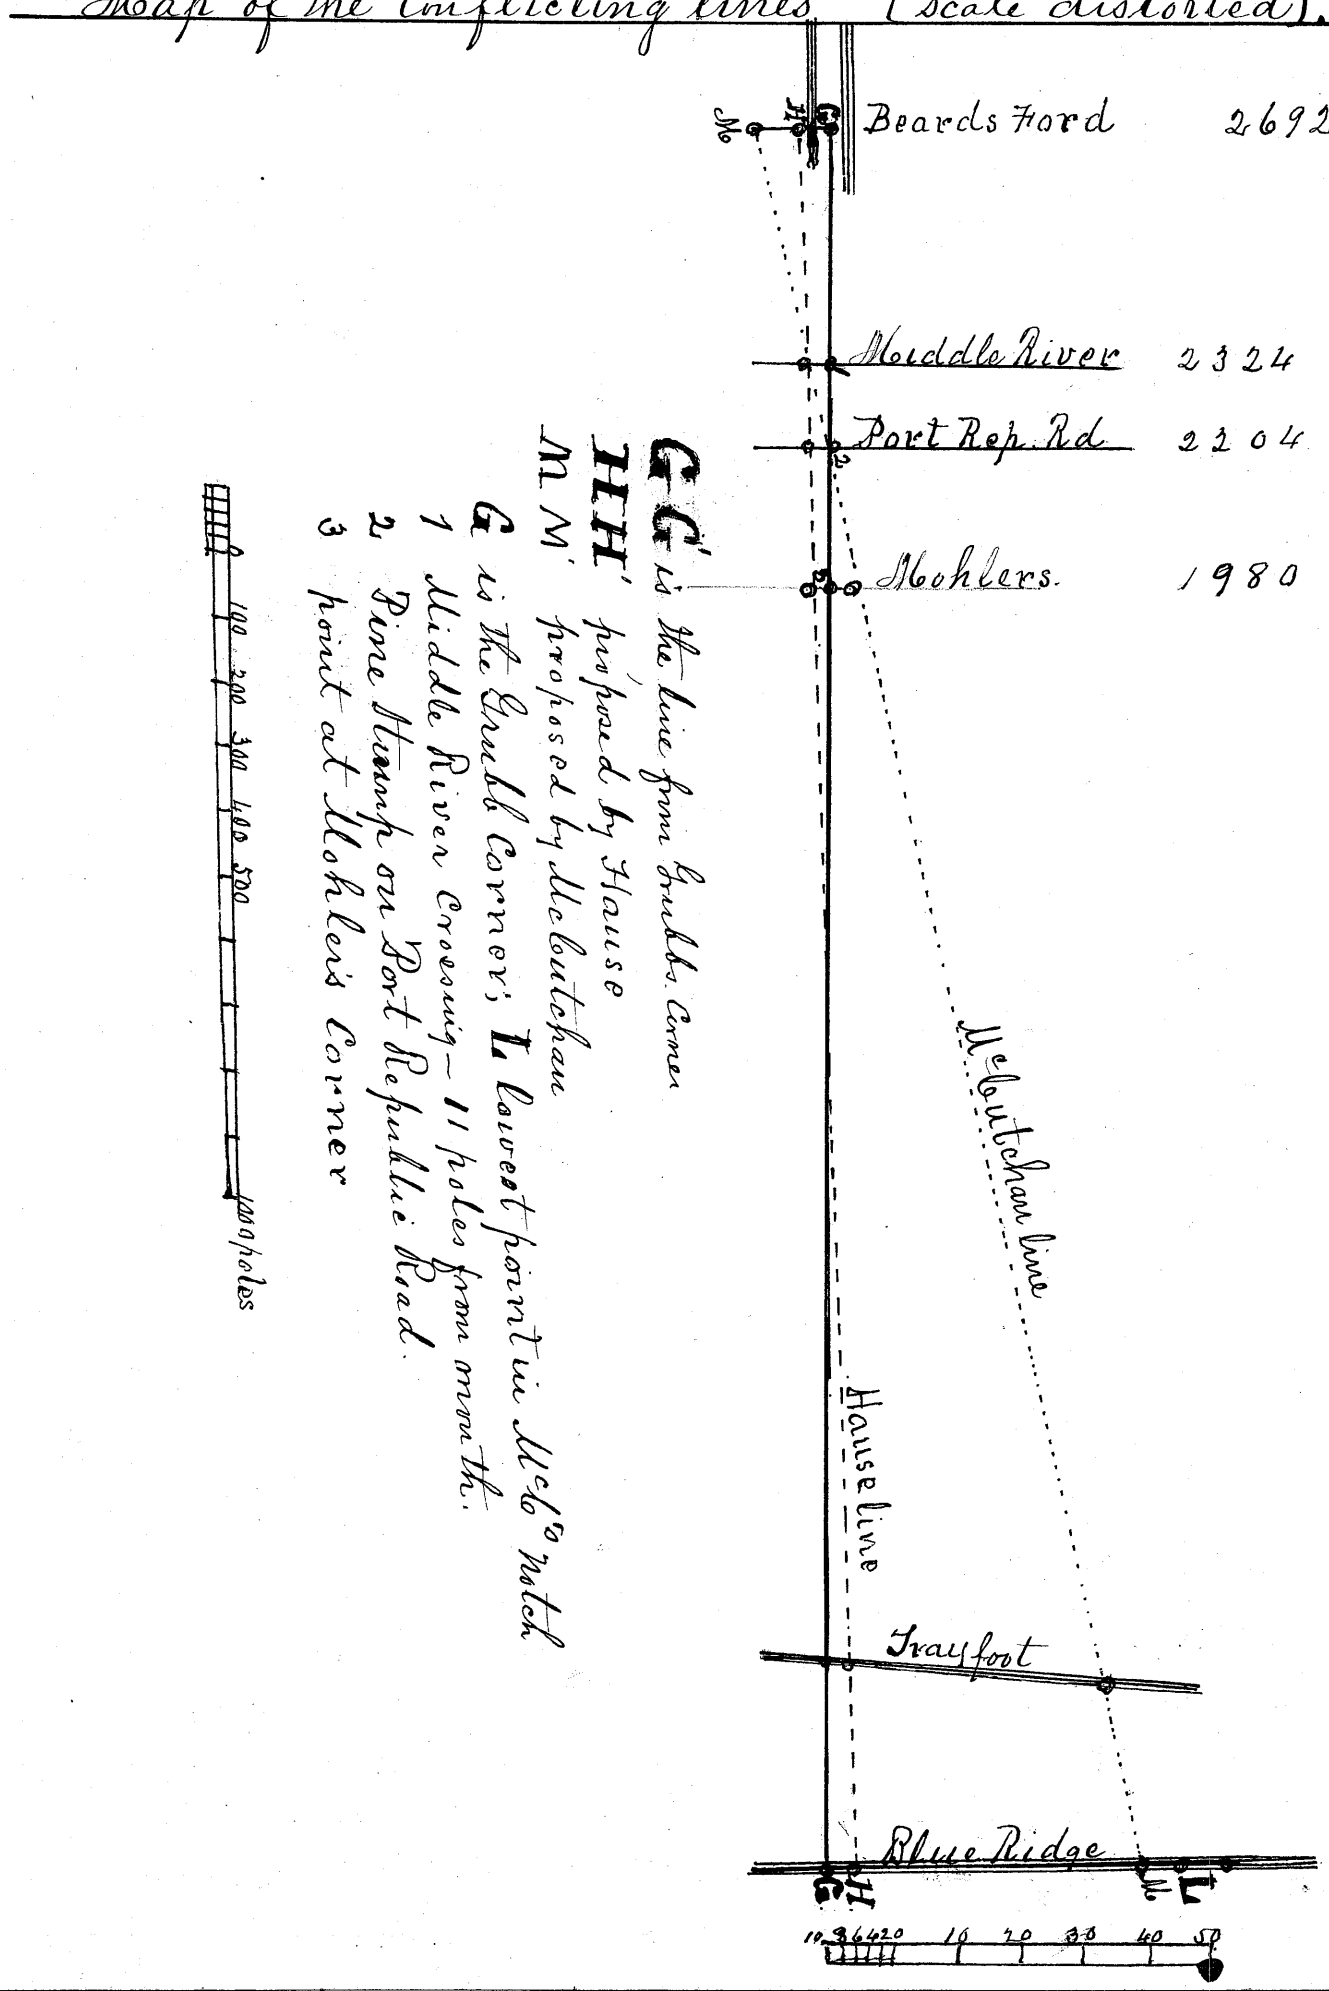

ii. The terminus was a sycamore above the ford. The age of this tree probably is sufficient: but no axe mark could be detected in the bark or elsewhere.

iii. The line between these points run too close to the Mohler house and too far from the probable site of the Dunnon's Mill; missed the line stump on the Port Republic road by over 40'; and cut Middle river nearly 50' too far above its mouth.

The accompany small scale map has the distances at right angles to the line exaggerated. The angles are thus distorted. But the alignment of the several points is truly shewn, and the ocular demonstration thus given will render the foregoing report clearer. On the true scale the transverse distance become invisible.

Virginia. At a County Court Continued and held in and for the County of Rockingham at the Court House thereof on Wednesday June 20. 1894

Present Hon George G. Grattan presiding

This Day came the Middle Shenandoah Land Company, who alleges that is is aggrieved by entries in the Land Book made by Joseph N. Mauzy, Commissioner of the Revenue for Stonewall District, in Rockingham County, for the year 1893, beginning at page 121. line Number 34. and ending on page 127. line 12. whereby it is charged C & S for C.

with Fifteen dollars and sixty six Cents. State Taxes, and Twenty three dollars and thirty four Cents County taxes for the year 1893, on 389 lots at $10.00 per lot, aggregating $3.890.00 described as lying at Shendun. And thereupon the said Middle Shendun Land Co., moved the Court to exonerate it from the payment of Eleven dollars and thirty eight Cents of the State Taxes and Sixteen dollars and ninety two Cents County taxes so erroneously charged against it for said year; which motion was defended by Chas. D. Harrison, the Attorney for the Commonwealth for said County, and the said Joseph N. Mauzy, the Commissioner who made the assessment, was examined as a witness touching the application.

And it appearing that said book in which said alleged erroneous entry has been made was delivered to the Treasurer of the said County on the Twenty ninth day of July 1893. and that the application for redress against the erroneous entry was made on this day for the first time: and it appearing that the Middle Shendun Land Company, was assessed in 1892. with 68 Acres of Land at $15.72. per acre including buildings, aggregating the sum of $1.069.38. and that the Commissioner, in placing the said lots on the land book, assessed them at $10.00 each, instead of the true amount, as per the assessment of 1892.
